

NATIONAL RESOURCE CENTER *for*  
PARTICIPANT-DIRECTED SERVICES

# PRE-CONFERENCE WORKSHOP

# MANAGED LONG-TERM SERVICES AND SUPPORTS: THE IMPACT ON PARTICIPANT DIRECTION

Suzanne Crisp

Director of Program Design and Implementation, NRCPPDS

# Welcome & Agenda

- Today's Agenda:
  - Managed Care Overview
  - Dual Eligibility
  - Managed Care & Financial Management  
Services Observations & Recommendations
  
- Interactive session – please ask your questions between sections

# History of Managed Care

- ❑ Early 1930's: Prepaid Health Plans in Oklahoma
- ❑ Mid-1940's: Prepaid Plans continue
- ❑ American Medical Association's attempt to suspend
- ❑ Former President Nixon – Health Maintenance Organizations - \$375 Million
- ❑ Fast forward to 1990's
- ❑ Today's trend – State's looking at Section 1115s or Section 1915 b/c to develop Managed Care option

# Why Managed Care?

- ❑ States looking for health care cost controls
- ❑ Shift toward integrated, coordinated care
- ❑ Less reliance on sole source revenue and more on competitive market – providers more responsive
- ❑ Service coordination reduces fragmentation
- ❑ Focus on transition planning
- ❑ Diversion easier to home and community-based services (HCBS) rather than institutions
- ❑ Elimination of waiting lists
- ❑ More frequent contacts with members by staff

# Managed Care Challenges

- ❑ Managed care focus has been on acute care - less familiar with home and community living and chronic illnesses
- ❑ High reliance on medical model
- ❑ Are health plans in a position to transfer responsibility and control to members?
- ❑ Should family caregivers provide services for free?
- ❑ Is sufficient guidance from the state offered to Managed Care Organizations (MCOs)?
- ❑ Health outcomes for managed long-term services and supports (MLTSS) not articulated
- ❑ Coordinating acute care with LTSS – new territory

# Are Managed Care & Participant Direction Compatible?

- ❑ Improving participant health, welfare & health outcomes
- ❑ Coordinating and integrating service planning & delivery
- ❑ Increasing service satisfaction
- ❑ Efficient use of available resources through flexibility
- ❑ Meeting the Olmstead obligation

# Center Research

- ❑ Reviewed (7 States) with support from Mathematica Policy Research
  - ❑ Request for proposals (RFPs)
  - ❑ Contracts
  - ❑ Policy & procedures
- ❑ Reviewed and Interviewed (5 States) with support from Mathematica Policy Research & Truven Health Analytics
  - ❑ Contracts, RFPs, & policies/handbooks
  - ❑ State officials
  - ❑ MCO administration & case managers
  - ❑ FMS agencies
  - ❑ Advocacy groups

# Domain Review

- ❑ Degree of flexibility
  - ❑ Employer and/or budget authority
- ❑ Available supports
  - ❑ Information & Assistance (I&A)
  - ❑ FMS
- ❑ Quality within the participant direction design
  - ❑ Reporting
  - ❑ Benchmarks
  - ❑ Satisfaction

# Centers for Medicare & Medicaid Services (CMS) Position

- ❑ CMS supports self-direction (SD) in both fee-for-service and managed care settings
- ❑ Most recently published in May, 2013
  - ❑ Applies to Sections 1115 and 1915(b)

*States that offer SD ... are expected to continue....*

*States that do not currently offer SD...should consider providing the opportunity...within MLTSS program*

# Medicaid Authorities Vary

- ❑ Sections 1915(b)/(c): FL, WI, MI, MN – Senior Care Plus Program, NM\*
- ❑ Section 1115: TN, AZ, TX, HI
- ❑ Sections 1915(a)/(c): MA, MN – Senior Health Options Program
- ❑ Section 1932(a): WA
- ❑ Sections 1115/1915(c): KS

\*NM changing from (b)/(c) to Section 1115 in 2013/2014

# General Findings

- ❑ All MCOs include elders & adults with disabilities
  - ❑ Intellectual/developmental disabilities services are typically carved-out
- ❑ All MCOs include acute, primary, LTSS (HCBS and nursing facilities) and behavioral health
- ❑ MCOs determine medical eligibility in over half the states - remainder use a conflict free entity to establish medical eligibility

# General Findings (cont.)

- ❑ Participant direction offered in all large MCO plans
- ❑ MCO provides initial introduction to participant direction
- ❑ Participant direction enrollment numbers are relatively small but growing
- ❑ Services using participant direction include personal attendant care with an increasing number allowing skilled care
- ❑ All states require MCO to document the participant direction offering to members except one (MA)

---

# Questions?

**Please use the microphones**

**We will have multiple  
opportunities for audience  
questions**

# Duties of the FMS Vary

- ❑ Collect and process timesheets
- ❑ Manage taxes and insurance
- ❑ Pay goods and services invoices
- ❑ Execute provider agreements
- ❑ Verify direct service worker qualifications are met
- ❑ Generate reports and track expenditures
- ❑ Conduct criminal background checks
- ❑ Train members on the participant direction process
- ❑ Coordinate with electronic verification timesheet system
- ❑ Provide supports broker services

# Employer and Budget Authority

- ❑ All 12 states reviewed adopted employer authority
- ❑ 8 of 12 states reviewed adopted employer authority & budget authority
- ❑ 2 of the 8 states that adopted budget authority have strict restrictions on purchases
- ❑ The managed care system does allow for the purchase of non-traditional items

# Information and Assistance

- ❑ Information & Assistance
  - ❑ Internal to MCO or subcontracted
- ❑ One state created a new function to manage the day-to-day supports provided to participants and coordinate activity with the MCO case manager and FMS provider
- ❑ Training is conducted internally by the MCO often with help from the Aging and Disability Network

# FMS

- ❑ All 12 states require the provision of FMS
  - ❑ States may select/specify/certify the vendor(s): IL, HI, TX, NM
  - ❑ States may delegate the selection and legal arrangement between the MCO and FMS: MA, KS, AZ
  - ❑ States may execute the legal agreement or may enter into a 3-way contract: TN
- ❑ The number of FMS vendors vary from 1 (TN, HI, NM) to 400 (TX)

# Unique FMS Practices

## ❑ Hawaii

- ❑ State conducts readiness review (FMS included)
- ❑ Case management ratio less for participant direction

## ❑ Illinois

- ❑ Relies heavily on Centers for Independent Living to conduct training and provide care coordination
- ❑ Department of Rehabilitative Services serves as FMS in a co-employer arrangement

## ❑ Kansas

- ❑ On 6/3/12 had 64 FMS providers – currently in a consolidating/eliminating phase
- ❑ Section 1115 required state separation of administration from service cost

# Unique FMS Practices

- ❑ Texas:
  - ❑ State qualifies FMS providers through training, MCO negotiates contracts
  - ❑ One FMS provides support brokerage
  - ❑ Reimbursement for FMS – flat rate or separation of administration from service costs
  - ❑ Quality Challenge Award - If PD enrollment increases by .5% or more from previous year, MCO is paid a bonus
- ❑ New Mexico:
  - ❑ MMIS vendor manages FMS sub-contract
  - ❑ Plan of care is managed electronically

# Unique FMS Practices

## ❑ Massachusetts

- ❑ Commonwealth offers no guidance on participant direction
- ❑ Three FMS providers operate individually
- ❑ One FMS provider has had success with private pay

## ❑ Tennessee

- ❑ FMS provides:
  - Typical FMS duties
  - Support brokerage
  - Training to members initially and on-going
  - Verifies worker qualifications
  - Detailed reporting requirements
- ❑ State very prescriptive with policy and procedures
- ❑ Great emphasis on quality measures (benchmarks established for participant direction increases) and reporting

# Challenges Identified by FMS Providers

- ❑ Lack of communication between members, FMS, MCO and State
- ❑ Short submissions time frame (e.g., 90 days)
- ❑ Flow of funding – MMIS to MCO to FMS to worker
- ❑ Reconciliations are a puzzle to MCOs
- ❑ Inconsistent service coordination staff training

# Feedback from MCO & FMS Providers

- ❑ Lack of policy and procedures (MCO & FMS)
- ❑ Lack of standardization may result in confusion or more work (MCO & FMS)
- ❑ One thing for an MCO to offer participant direction, another to promote the option (FMS)
- ❑ Focus – meeting the terms of contract, but not providing quality service (FMS)
- ❑ We asked an MCO, “How do you know if the FMS is providing poor quality services?” Their response was, “*We would get a complaint.*” (MCO)

---

# Questions?

**Please use the microphones**

**We will have multiple  
opportunities for audience  
questions**

# Observations

- ❑ Commitment to participant direction is related to the state's expectations and guidance
- ❑ States are supportive of participant direction, but they lack specificity in their contracts
- ❑ Unclear if MCOs understand how to operationalize participant direction
- ❑ Specific language in state policy & procedures may yield more flexibility than language embedded in contracts
- ❑ Worker registries are needed, but are not offered

# Observations

- ❑ The introduction, orientation, & on-going support of participant direction can be time-consuming for service coordinators
- ❑ Measures are not in place to ensure this option is presented in a consistent manner
- ❑ Stringent EVV systems limits program flexibility
- ❑ While participant engagement is mentioned in most contracts, advocates question whether meaningful participant involvement occurs

# PD Disincentives

- ❑ New Mexico
  - ❑ If new to LTSS, must use traditional services for 120 days prior to self-directing.
- ❑ Tennessee
  - ❑ Extensive credentialing process for direct service workers
  - ❑ Service plan with specific date, time and services are electronically monitored and work in conjunction with a telephone verification system. If services do not occur within 45 minutes – claim suspends. If worker does not show, FMS and MCO are notified immediately.
  - ❑ Strict hiring criteria – if a person has lived with the participant in the last 5 years that person can't be hired
- ❑ Arizona care coordinator responsible for ensuring the back-up plan is working

# Recommendations

- ❑ States should provide guidance on participant direction to MCOs
- ❑ States should encourage standardization among providers and health plans, up to MCOs
  - ❑ Software Issues
  - ❑ Consistent policies, processes, and protocols
- ❑ Participants need better information and more time to make an informed decision
- ❑ State may delegate too much responsibility to MCOs
  - ❑ Each MCO sets hourly wage
  - ❑ Uses own screening criteria

# Recommendations

- ❑ Outcomes should be tied to LTSS outcomes
- ❑ Training of health plan staff should be consistent
- ❑ Conducting readiness reviews measures preparedness
- ❑ Ensure MCOs understand participant direction and the member's rights to hire (or refer), train, supervise and dismiss workers (at least from the home)
- ❑ FMS could be part of the value added to MCO plans
- ❑ Ensure a solid quality assessment and improvement plan is in place
- ❑ Data should have meaning

---

# Questions?

**Please use the microphones**

**We will have multiple  
opportunities for audience  
questions**

# Dual Eligibility

- ❑ Individual who is eligible to receive both Medicare & Medicaid
- ❑ More than 9 million individuals are dually eligible
- ❑ Typically, high-need, high-cost, and account for a disproportionate share of spending in both programs

# Current System

- ❑ Medicare and Medicaid are not integrated or coordinated
- ❑ Policies and provider reimbursement are separate
- ❑ Benefits, enrollment, and protections are inconsistent
- ❑ Individuals are not empowered to make decisions due to the complexities of the system
- ❑ Billing differences between providers create administrative inefficiencies
- ❑ Unnecessary or duplicative spending

# Brief History

- ❑ Affordable Care Act of 2010
- ❑ Created Medicare-Medicaid Coordination Office (MMCO)
- ❑ Two New Opportunities
  - ❑ State Demonstration for Integrated Care for Dual Eligible Individuals (\$1 Million for 15 States)
  - ❑ Financial Alignment Demonstration (as of 9/13 - 20 states)
    - Capitated model
    - Managed fee-for-service
- ❑ Purpose: Improve coordination and alignment of services for Medicare/Medicaid enrollees

# Current Status

- ❑ Financial Alignment Demonstration:
  - ❑ 6 states withdrew – concerns about workload
- ❑ State Demonstration for Integrated Care & Financial Alignment Demonstration:
  - ❑ 7 states have signed Memorandum of Understanding (MOUs) with CMS and health plans

---
